

Figure 3

se your FTP client to access the GMU server. Open your FTP c
o SSH/SFTP. The server name is "mason.gmu.edu". Your user
ok like Figure 4 below (FileZilla and PuTTY are very similar).

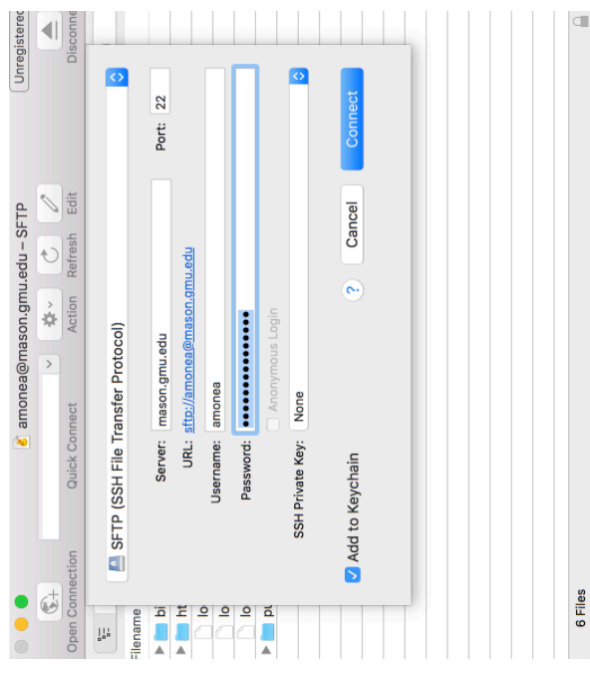

Figure 4

into the server, you should see a folder titled "public_html". Double click that folder t
ghout the semester. Try either dragging and dropping or right clicking and selecting u
rld.html file has successfully uploaded to the server, open up a web browser window
one in this link): mason.gmu.edu/~username/helloworld.html
